##### bzw. Freischaltung auf Anhängerbetrieb

Die vorab genannten Einstellungen werden im Bordnetz des Fahrzeuges vorgenommen und lokal abgespeichert. Bei generellen Updates der Fahrzeugsoftware (beispielsweise im Rahmen von Service- oder Instandsetzungsarbeiten), können diese Einstellungen unter Umständen wieder überschrieben und gelöscht werden. In diesem Fall muss die Freischaltung auf Anhängerbetrieb nach dem Update noch einmal lokal aktualisiert werden. Diagnosehinweise in Bezug auf Anhängerbetrieb, die bei Soll-/Ist-Vergleichen mit den im Herstellerwerk hinterlegten Daten auftreten können, liegen ggf. der lokalen Freischaltung zu Grunde.

## CODING WITH ODIS

### Please note:

The procedure described below for encoding and enabling the trailer mode only serves for a general orientation and can vary greatly depending on the model (motorisation / equipment). If necessary less or further control units will have to be adapted.

**After connecting to ODIS, the "69 trailer function" controller has to be set to encoded in the target installation list.**

The following may be necessary in the further course of work:

#### EZE\_09 (electronic central electric controller):

#### Important note on encoding and activating in trailer mode

The aforementioned settings are carried out in the vehicle's electrical system and saved locally. During general updates for the vehicle software (for example, within the scope of service or repair work), the settings may be overwritten and deleted under certain circumstances. In this case, the trailer mode activation has to be updated again locally after the update. Diagnostic information relating to the trailer mode that may appear during variance comparisons with the data saved in the manufacturer's works, may form the basis of the local activation.

## CODAGE AVEC ODIS

### Attention:

La procédure de codage ou d'activation du fonctionnement avec remorque décrite cidessous sert uniquement d'orientation générale et peut varier fortement d'un modèle à l'autre (motorisation / équipement). Le cas échéant, il peut s'avérer nécessaire d'adapter moins ou d'autres dispositifs de commande.

**Une fois la connexion avec ODIS établie, mettre l'appareil de commande "69 fonctionnement avec remorque" sur codé dans la liste d'assemblage théorique.**

Remarque importante sur le codage ou sur l'activation du fonctionnement avec remorque Les réglages mentionnés ci-dessus sont effectués dans le réseau de bord du véhicule et sauvegardés localement. Lors des mises à jour générales du logiciel du véhicule (par exemple dans le cadre de travaux de maintenance ou de réparation), ces réglages peuvent dans certaines circonstances être écrasés et supprimés. Dans ce cas, l'activation du fonctionnement avec remorque doit être à nouveau actualisée localement après la mise à jour. L'activation locale peut le cas échéant être causées par des remarques de diagnostic relatives au fonctionnement avec remorque susceptibles d'être générées lors de la comparaison entre valeurs théoriques/valeurs réelles effectuée avec les valeurs conservées dans l'usine du constructeur.

## CODIFICA CON ODIS

### Attenzione:

Il procedimento di codifica o abilitazione a esercizio rimorchio descritto qui di seguito serve esclusivamente come orientamento generale e può variare radicalmente a seconda del modello (motorizzazione / dotazione). È possibile che meno o altre centraline debbano essere adeguate.

**Dopo la connessione con ODIS, nella lista d'installazione nominale la centralina "69 Funzione rimorchio" deve essere codificata.**

Nell'ulteriore procedura potrebbe essere eventualmente necessario:

### Avvertenza importante per la codifica o l'attivazione per funzionamento con rimorchio

Le impostazioni indicate in precedenza vengono effettuate nella rete di bordo del veicolo e memorizzate localmente. Nel caso di update generali del software del veicolo (ad esempio nell'ambito dei lavori di assistenza e messa a punto), in particolari circostanze è possibile sovrascrivere e cancellare nuovamente queste impostazioni. In questo caso dopo l'update deve essere nuovamente aggiornata localmente l'attivazione per funzionamento con rimorchio. Le avvertenze di diagnosi in riferimento al funzionamento con rimorchio, generate durante una comparazione dei valori nominali/effettivi con i dati inseriti in fabbrica dal costruttore, potrebbero dipendere dall'attivazione locale.

El proceso descrito a continuación para la codificación y/o la habilitación para el servicio con remolque sólo sirve para una orientación general y puede variar considerablemente dependiendo del modelo (motorización / equipamiento). En caso dado puede que tengan que adaptarse menos o otros reguladores.

**Después de haber establecido la conexión con ODIS se deberá ajustar el controlador "69 función de remolque" en la lista de dispositivos a codificado.**

En el transcurso del proceso puede que sea necesario:

### Codificación EZE\_09 (controlador del sistema eléctrico central electrónico):

Nota importante sobre la codificación y/o habilitación del modo remolque. Los ajustes anteriormente mencionados se llevan a cabo en el sistema eléctrico de a bordo y se guardan de forma local. Al realizar actualizaciones generales de software del vehículo (por ejemplo con motivo de trabajos de mantenimiento o reparación) es posible que estos ajustes se vuelvan a borrar y sobrescribir. En tal caso se deberá volver a actualizar la habilitación del modo remolque de forma local después de la actualización. Los avisos de diagnóstico relacionados con el modo remolque, que puedan aparecer en caso de comparaciones de datos teóricos/reales con los datos depositados en la fábrica, se pueden deber a la habilitación local.

Belangrijke aanwijzing voor het coderen, dan wel het deblokken van het aanhangerbesturingsysteem. De eerder genoemde instellingen worden uitgevoerd op de boordcomputer van uw voertuig en worden lokaal opgeslagen. Het is echter mogelijk dat bij een algemene update van uw voertuigsoftware (bijvoorbeeld in het kader van een servicebeurt of tijdens herstelwerkzaamheden) uw instellingen onder bepaalde omstandigheden worden overschreven dan wel gewist. In dat geval moet de deblokking van het aanhangerbesturingsysteem na de update nog een keer lokaal worden uitgevoerd. Eventueel kunnen er diagnostische instructies/meldingen ten aanzien van het aanhangerbesturingsysteem worden gegenereerd door het feit dat er lokaal wordt gedeblokkeerd – die situatie kan zich voordoen wanneer de fabrieksinstellingen worden gebruikt in vergelijkingen tussen een actuele en een gewenste situatie.
