- CA** The owner's responsibility for the assembly is not carried out properly by the installer. A competent installer will result in cancellation of any right to damage compensation, in particular those arising from the use of the product liability act. The installer must be able to prove that he has followed the instructions for use. In addition, please ensure that these instructions are read of the product liability act before commencing installation. Do not overlook crucial, the maximum loads per axle and the maximum weight of the vehicle. The maximum weight of the vehicle is reviewed before beginning the assembly. The installation instructions are used to be thoroughly read. The installation should be carried out by qualified personnel (mechanics) who are familiar with the correct installation of the vehicle. The correct technical notes and information on retrofitting must be followed. The removal and replacement instructions found in the current repair manuals must be followed. After the installation, the vehicle must be checked for correct installation of a trailer hitch. It must be ensured that the in-vehicle computer can be programmed for the addition of a "trailer hitch". The vehicle's load memory must be reset. After the installation, the vehicle must be checked for correct installation. In addition must be programmed to trailer operation according to the diagnosis system. The vehicle's load memory must be reset. The vehicle's load memory (parking aids) must be separately coded to the equipment variant "trailer hitch". In the event of functional problems, troubleshooting must be limited to
