Fitting instructions:

1. Dismantle an aluminium exhaust pipe cover and unstick end caps from assembling holes in the back side.
2. Put M10 car body nuts into prepared holes in beams and M12 car body nuts into the back side (or there are already prepared M12 threads).
3. Attach left and right sides to the beams and the back side (a welded strap goes towards to a car body). Do not tighten!!
4. Attach the main beam to already prepared sides to a car body by using M10x40 bolts.
5. Tighten everything according to torque moments. Put the exhaust pipe cover back.

General instructions:

- 1 Remove insulating material on a car body in grips and joints of a tow bar with a car body. Clean all drilled holes with anticorrosive agent and remove all metal shavings.
- 2 Keep ball hitch and all moving parts clean and grease them, use on friction areas and use original supplied plastic covering caps.
- 3 Use supplied mechanical strenght jointing material.
- 4 It is recommended to retighten all fixing bolts and nuts after coupling device has been in use approximately 1000 km.
- 5 According to a law a ball hitch cannot cover a number plate.
- 6 Wiring of a tow bar must be up to a standard and car maker requirements (see a car manual or ask a car dealer).

The tow bar has been physically tested according to a regulation 94/20/EC and EHK UN No.55 and fulfils all prescribed ES regulations
