Fitting instructions:

1. From the back side remove four end caps from the holes with M8 threads and from beams, remove covering end caps from both sides.
2. Attach side lashes to beams by using M10x100 bolts with spacing tubes L = 65mm and large area washers.
3. Bolt tow bar sides to the back side by using four M8x30 bolts with large area washers. Then bolt them to lashes by using four M12x35 bolts.
4. Between them attach the main beam of a tow bar by four M12x35 bolts and tighten everything properly according to torque moments.

General instructions, also see Type certificate:

1. Clean a car body from soft anticorrosive protection of a car body coat in brackets and joints of a coupling device with a car body. Clean all drilled holes from metal shavings and treat them with antirust agent.
2. Use supplied strength joining material.
3. A ball pin, according to a law, cannot cover a number plate, if a trailer is not joined.
4. Wiring of a coupling device must be up to a standard and car maker requirements. (see a car manual or ask a car seller).
5. The coupling device has been physically tested and homologated according to the regulation EC 94/20 and is up to the EC standard.
